

SofTrack Quick Inventory

Hardware, Software and Change Tracking for Windows® and Macintosh® workstations

Overview

SofTrack's Quick Inventory helps you document your Windows® and Macintosh® workstations and quickly discover changes in hardware and software configurations. Gain an understanding of the state of your workstation configurations with SofTrack's Quick Inventory. Augment inventory reports into your existing lifecycle management tools and processes. Identify your assets, particularly following a merger, acquisition or divestment. Your inventory reports serve many essential needs such as locating unused software assets, infringing software installations as well as non-standard workstation configurations.

SofTrack installs quickly and simply into your existing infrastructure with no downtime required. Contact us today for your live demonstration of SofTrack.

Benefits

- Save money by reducing the time to conduct a full inventory of your network;
- Be aware of changes to your network with daily reports of workstation configuration changes of hardware and software;
- Secure your network by discovering any workstations not utilizing the appropriate service packs and hotfixes including ROM patches;
- Inventory all your workstations including those not connected to the network;
- No user interruption, full inventory scan takes less than 20 seconds;
- Comprehensive inventory reports reveal the information you need to maintain your environment;
- Discover "old software" that is still installed on workstations where no longer used and re-deploy.

Features

- Patent-pending technology takes less than 20 seconds to gather a complete hardware and software inventory of your workstations;
- Inventory data is collected to a secure server directory and is available for immediate reporting;
- Change tracking reports are immediately available upon receipt of new workstation inventory;
- Inventory data can be collected from remote workstations via email or other method of your choice;
- Tracks application serial number where available;
- Detects Adobe Reader freeware versus purchased versions;
- Collects workstation Manufacturer data including ROM version data;
- Supports all versions of Windows® and Macintosh® OS9 and OSX.
